

Safe and Sustainable Food Packaging in Food and Beverage Sector

Food packaging material, especially single-use plastics, has become a threat to health and the environment. The Safe and Sustainable Food Packaging in Food and Beverage Sector initiative promotes the use of safe and environment friendly food packaging material through advisories on alternative packaging materials, conducting awareness programmes towards plastic waste management and plastic recycling drives.

Features

- 1 Awareness campaigns for no plastic use
- 2 Plastic collection drives
- 3 Recycling of collected plastic waste
- 4 Promotion of environment-friendly packaging material
- 5 Mobilization of food businesses for a plastic-waste free F&B sector

Stakeholders

- Food Safety Department of States/UTs
- Food Businesses
- Consumers
- Regulators
- Research Institutes
